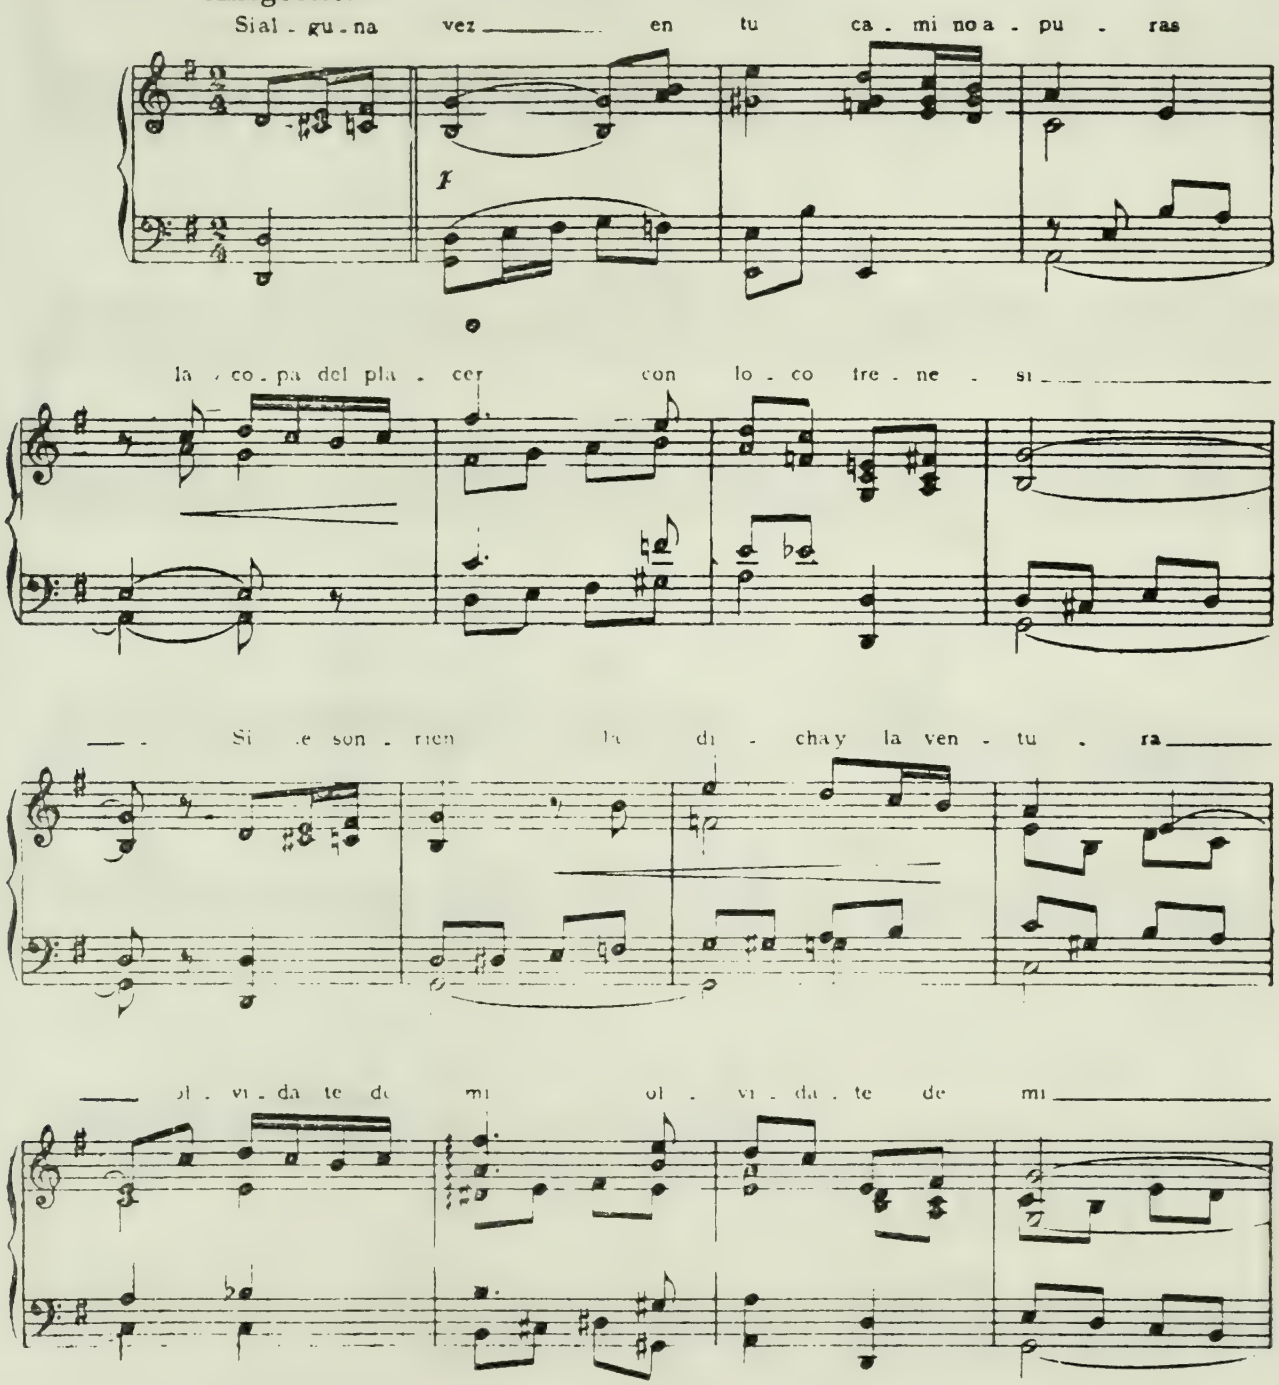
ARREGLO DE

M. M. Ponce.

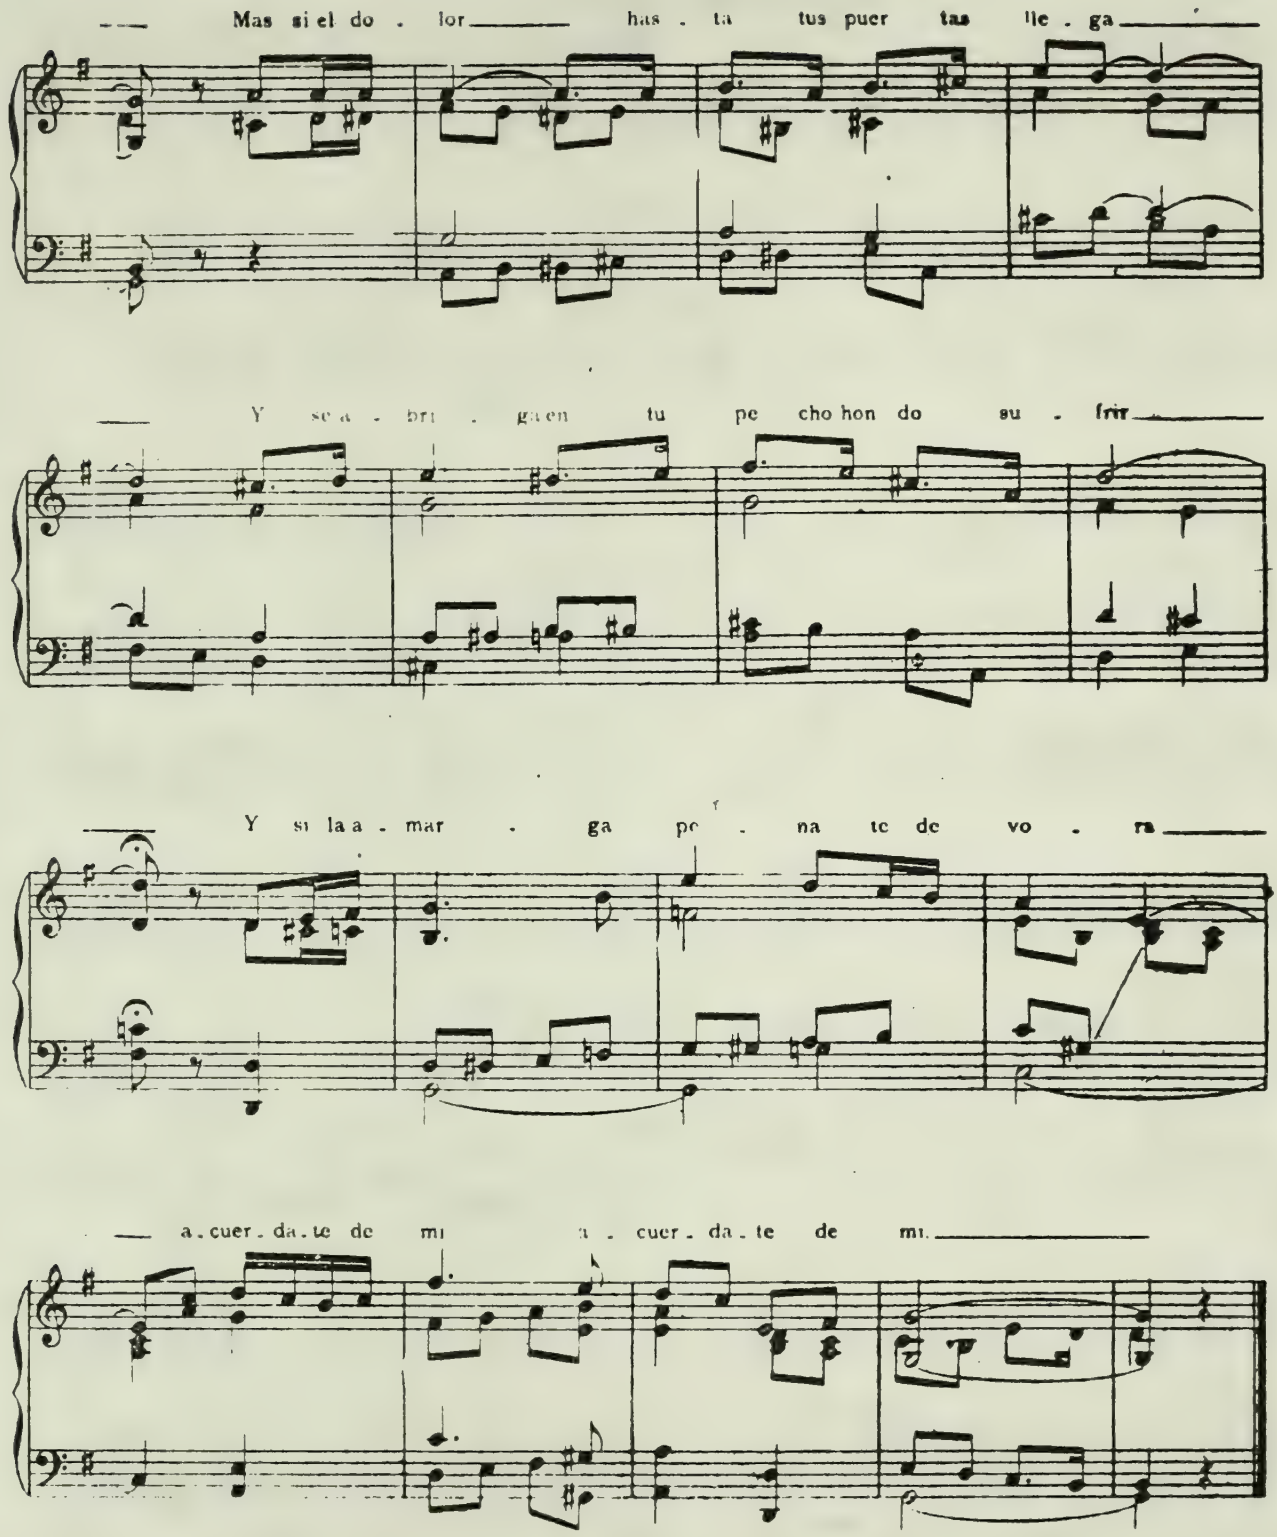
Allegretto.



MANUEL M. PONCE

El eminente compositor mexicano Manuel M. Ponce, que estudió armonía y composición en Bolonia y piano en Berlín, es una personalidad interesante bajo los aspectos como compositor original y como folklorista. Como creador de música propia se ha conquistado un nombre en breves años, por la delicadeza y elegancia en la forma y la inspiración del numen.

Compuso desde muy joven música para piano solo, en una constante ascensión, aunque empleando siempre las formas menores por predilección, pues de esa época solamente se conocen un concierto para piano y orquesta y un trío para piano, violín y violoncello; y no fue sino en la madu-



rez de su talento cuando abordó las altas formas musicales, aunque su nombre estaba consagrado con su producción juvenil. Entonces revelóse como folklorista, recogiendo multitud de canciones populares para presentarlas en una forma artística, escritas para canto y piano. Al mismo tiempo abordaba las formas rapsódicas con singular maestría y exquisito gusto, por lo cual sus versiones y rapsodias despertaron palpitante interés en la juventud por la música folklórica aunque ninguno de los jóvenes rápsodas ha logrado eclipsar al iniciador, ni transcribiendo canciones ni parafraseando aires populares. Recientemente se ha publicado el catálogo de sus obras originales, que pasan de un centenar, y las canciones populares que ha escrito para canto y piano pasan de doscientas, lo que es una laudable labor realizada, que le ha conquistado el primer rango entre los compositores modernos por la exquisita poesía de que está impregnada su música.
